DETAILED ACTION

Claim Objections

Claims 9 and 11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to another claim in the alternative only. See MPEP § 608.01(n). Accordingly, claims 9 and 11 have not been further treated on the merits.

Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Setting forth the intended use of the compounds of claim 1 is not seen to impart patentability to the claim. Claims 3 and 5 are seen to be objected to for the same reasons.

Applicant is advised that should claim 6 be found allowable, claim 8 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). It is noted that the agents comprise the same ingredients, as such, setting forth different intended uses is not seen to make the compositions patentably divergent.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Mahato et al. ("Triterpenoid Saponins From *Medicago hispida*", *Phytochemistry*, vol. 30, no. 10, pp. 3389-93, 1991).

Mahato disclose a compound which anticipates the compound of claim 1 where A is a single bond and B is a double bond. See compound 4, page 3390. Moreover, Mahato et al disclose the compound is extracted from *Madicago hispada*, which is used as green fodder in India (see introduction). As such, the green fodder, which is animal food, must have inherently comprised the compound, and is seen to meet the limitations of the composition/feed claims instantly set forth.

Claims 1-8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Empie et al. (US 6,261,565).

Empie et al. disclose compositions comprising soyasapogenol F, which is seen to be the compound of claim 1 where A is a single bond and B is a double bond (see claim 19). The compositions are taught to be used as a dietary supplement for treating cancer (see abstract). As such, the compositions of Empie et al. are seen to anticipate claims 1-8 and 10 of the instant application.
